What is ColoSTAT® for?¹

If you're experiencing symptoms related to bowel cancer, **ColoSTAT®** can help your doctor with getting a diagnosis.

ColoSTAT® is:

- ✓ Highly sensitive for detecting bowel cancer
- ✓ Faster than a colonoscopy
- ✓ Clinically safe
- ✓ A simple blood test
- ✓ Helpful in managing your health for peace of mind.

ColoSTAT® is a blood test that detects the presence of bowel cancer. It is for people who have symptoms that could mean they have bowel cancer, such as:^{1,2}

**Blood
in stool**

**Change in
toilet habits**

**Unexplained
tiredness or
weight loss**

**Stomach or
abdominal pain**

The test is accurate for both early and late stage cancers.^{1,3,4}

A clear result¹

A **ColoSTAT®** test gives you a positive or negative result.

- +** A **positive result** means that cancer might be present. This result should be followed up with an urgent colonoscopy.
- A **negative result** means that there is a less than 1% chance that cancer is present.

These results can help you and your doctor decide the best course of action for your health. This could include prioritising you for urgent investigation or treatment.

Who is ColoSTAT® for?¹

To be eligible for **ColoSTAT®** you need to be:

✓ aged 45-84

✓ have symptoms of bowel cancer

If you don't meet these requirements, discuss other options with your doctor.

How soon can I expect results?

You can expect results within 4-10 working days of your test.

How does the test work?^{3,4}

ColoSTAT® works by measuring the levels of five proteins in your blood that are associated with bowel cancer. The results are then analysed to provide either a positive or negative result.

How do I access ColoSTAT®?¹

Your doctor will order the test. Because the test is not paid for by Medicare, you will need to pay a private fee of \$249.

Ask your doctor about ColoSTAT® and whether it's right for you.
